SMARTVAP

INTUITIVE EVAPORATOR CONTROL TECHNOLOGY

NOTHING BEATS A BALLY

SMARTVAP

INTUITIVE EVAPORATOR CONTROL TECHNOLOGY

INTUITIVE AND SIMPLE

Bally's SmartVap+ intuitive evaporator control technology is designed to replace traditional electro-mechanical refrigeration controls typically used on medium and low temperature applications. By combining award winning adaptive technology along with an electronic expansion valve, Nothing Beats a Bally for innovative, state-of-the-art designs.

On most models, its two pipes, two wires and you're done. No interconnecting control wiring between the evaporator and the condensing unit is required.*

*Visit b-rp.ca/SmartVapPlus for details

BENEFITS

- Quick simple installation
- Improved evaporator performance by minimizing excessive frost on the evaporator
- Eliminates ice build up on surfaces and product
- Energy savings through evaporator fan management
- Energy savings with reduction in the number of defrost cycles
- Defrost heater management
- Improved system diagnostics and service through advanced alarm notification text/email
- Remote monitoring & system control
- User friendly interface
- Precise temperature control for prolonged product shelf life
- Improved product integrity with less potential for spoilage
- Downloadable data provides system history for prior 30 days
- Remotely view and change system parameters and alarm settings
- Manually control system
- Easily troubleshoot issues

WHAT IT CONTROLS

- Box Temperature
- Superheat
- Defrost Initiation
- Defrost Termination
- Fan Motors
- Defrost Heater (Electric Defrost Models)

**ADAPTIVE CONTROL AND
REMOTE SMARTVAP+ DISPLAY**

**ELECTRONIC EXPANSION VALVE
ENSURES GREATER SYSTEM STABILITY
AND BETTER EVAPORATOR CONTROL**

TIMED DEFROST VS ADAPTIVE DEFROST

Room and Coil temp - Month

86% fewer defrost cycles*

- Enhanced system performance
- Energy savings
- Improved product integrity

* Data may vary depending on application

FEATURE COMPARISONS

SMARTVAP+

COMPETITOR

Adaptive control for air/electric defrost applications	Yes	No
“Bonding” ability for up to 8 controllers to maintain high efficiency on single or multiple unit cooler installs. Not master/slave set up	Yes	No
Can be applied on a variety of evaporator styles	Yes	No
Ability for integration with door switch to improve efficiency and reduce frost issues	Yes	No
Can be easily configured with lead/lag systems	Yes	No
Ability to send text/email alarms	Yes	No
Effectively eliminates icing issues	Yes	No
Local web pages, graphs and data logging for ease of trouble shooting/set point changes	Yes	No
Ability to view and control system operation remotely to assist contractor with system diagnostics	Yes	No

SYSTEMS SAVINGS SOLUTIONS

Bally offers a complete line of commercial refrigeration products. From the smallest unit to the very largest, Bally brings experience and commitment to the refrigeration industry - beginning with product design and engineering, and continuing through manufacturing, sales and after market support.

Bally continues to ensure that Nothing Beats a Bally, providing an award-winning line of Systems Savings Solutions, designed to reduce environmental impact, reduce energy consumption, increase system efficiency and more.

LIMITROL

FLOATING HEAD PRESSURE CONTROL SYSTEM

Limitrol+ combines various technologies into a responsive system that floats head pressure, saving energy and reducing environmental impact.

LINK/LINK

MULTI-COMPRESSOR REFRIGERATION SYSTEM

Provides a conveniently centralized package for compressors, electrical and controls, allowing for maximized merchandising space.

SMARTSPEED TM

FAN MOTOR TECHNOLOGY

Simple, innovative EC motor technology offers significant energy savings through an award winning patented system configuration.

QUIETUNIT

REFRIGERATION DUTY CONDENSING UNITS

The award winning Quiet Unit is designed for refrigeration duty, and ideally suited for applications where space limitations, energy efficiency or sound levels are of concern.
