COOKSHACK

The Cookshack Charbroilers electronically-controlled pellet cooking system keeps the charbroiler cooking at a consistent temperature while creating that wonderful wood grilled flavor that people love. The system is fueled by 100% food grade wood pellets, introduced into its "firepot" by auger which requires only a small amount of electricity to operate.

"Hand-crafted, Charbroiler with the Consistency and Real Wood-Smoked Flavor!"

Easy To Use: Anyone who can cook on a gas charbroiler can cook on a Cookshack Charbroiler. No special training is required, unlike log-fired grills which require the cook to judge the heat of cooking surface while adding logs and trying to cook at the same time! With the Charbroiler, the cook simply sets the cooking temperature and the Charbroiler regulates the wood and the cooking temperature. Your cooks concentrate on the quality of the food, not on stoking a fire.

Consistently Delicious Results: The Charbroilers electronically controlled pellet cooking system keeps the charbroiler cooking at a consistent temperature while wafting wood smoke over your steaks and burgers. Its heavy duty cast iron grates distribute heat evenly, eliminating hot spots. You have complete control over the temperature and the cooking process, and you get consistent results.

How It Works: The Charbroiler is 100% wood-fired. It was the first commercial pellet fired Charbroiler line allowing you to cook directly over the flames. The controls eliminate the need to build and maintain a fire, making it easy to add wood smoked flavor to everything you grill.
